FIRST ANNOUNCEMENT

## SCIENCE DIPLOMACY

### Studies in the Historical Entanglement of Science, Technology and Diplomacy

Editor: Maria Rentetzi

This series seeks to place the relation among science, technology, and diplomacy within a historical perspective. Works in the series may focus on the complexities of the tangled relationship between two intrinsically valued practices, the scientific and the diplomatic. Particular attention is given to the intertwined roles of epistemic and diplomatic aspects of scientific work in the period especially after the second World War, though this does not exclude earlier aspects of science and technology diplomacy. The multifaceted historical relation between science and diplomacy extends across disciplinary, institutional, and geopolitical confines and as such requires a highly interdisciplinary approach. The series adopts a global perspective on science diplomacy and welcomes proposals for monographs and collective volumes with strong historical and epistemological elements.
